

## CONTENTS

### REVIEW

Thermophysical properties of 1D materials: transient characterization down to atomic level

..... *Amin Karamati, Shen Xu, Huan Lin, et al.* (1001)

Synthesis, properties, and applications of topological quantum materials

..... *Junjie Wu, Ying Zhang, Bin Xiang* (1002)

### ARTICLE

#### Engineering and Materials Science

Design of novel double-layer wrapped ammonium polyphosphate and its application in aging-resistant and flame retardant crosslinked polyethylene composites

..... *Pengfei Jia, Pengfei Sun, Fuhao Yu, et al.* (1003)

Effects of residual stress caused by abrasion on the flexoelectric response of BaTiO<sub>3</sub> ceramics

..... *Xu Yang, Dongxia Tian, Xiaoyan Zhang, et al.* (1004)

Assessment study of different radiation models in the simulation of 1 m methanol pool fire

..... *Qianjun Zhou, Yong Hu, Yong Jiang* (1005)

Predicting vapor-liquid equilibria of CO<sub>2</sub>+HFC binary mixtures by the PR EOS combined with a group contribution model

..... *Zirui Wu, Lingfeng Shi, Rui Sun, et al.* (1006)
